Roxanne Edwards, DOE Idaho

om: S. Neuhauser, 6321, SNLA

Date: February 25, 1988

Subject: Personal Communications with D. Mulryan, DOE/ALO

According to my records, on September 2, 1987 and one other occasion (undated) during September 1987, I spoke on the phone with Mr. Mulryan to obtain information on shipping configurations, stop times, crew numbers, etc. for DOE shipments of 6Ms in SSTs as part of the data-gathering effort for the risk analysis of SIS shipments. With respect to the shipping configurations, Mr. Mulryan informed me that a fully loaded SST would hold either 60 30-gal 6Ms or 48 50-gal 6Ms.
